

Aluminum Foil Large Rolls | Haomei Aluminium Foil

Haomei Aluminum is a professional supplier of [aluminum foil large rolls](#) with alloy 8011/8079/1235/ 1060, we supply low price and fast production & delivery.

Large aluminum foil roll can be used for making foil container/foil tray/foil platter, it is superior household material for packaging which features resistance to water and oil, isolation to light and conductivity of heat. It is environmental friendly and is reusable. It can be reused and can isolate light and conduct heat. Because of these features, it is widely used in the food packaging industry.

Due to the good character of anti-corrosion, non-poisonous, waterproof, tasteless, grease proof and durable. Large rolls of aluminum foil for sale are widely used in many field, such as for food industry, pharmaceutical industry, decoration, hairdressing and other sectors. Our factory is a professional manufacturer of big roll of aluminum foil products.

The specifications for aluminum foil large rolls :

1, Household Aluminum Foil

Alloy	Temper	Thickness	Width	Surface
8011\1235	O	0.006-0.015mm	100-1600mm	Single light
Use	Used for various household barbecue, food preservation			

2. Aluminum Foil For Food Container

Alloy	Temper	Thickness	Width	Surface
8011\3003	O\H22\H24	0.03-0.2mm	50-1600mm	Double-sided light
Use	Used to make all kinds of aluminum foil container and aviation lunch box			

3. Electronic Label Foil

Alloy	Temper	Thickness	Width	Surface
1060	O	0.03-0.1mm 0.01-0.012mm	100-900mm	Double light/Single light
Use	Used for making all sorts of EAS,RFID tag with base material			

4. Honeycomb Aluminum Foil

Alloy	Temper	Thickness	Width	Surface
-------	--------	-----------	-------	---------

3003	H18\H19	0.03-0.1mm	100-1000mm	Double-sided light
Use	Used for making all sorts of EAS,RFID tag with base material			

5. Lid Foil

Alloy	Temper	Thickness	Width	Surface
8011	O	0.025-0.04mm	300-1000mm	Double light/single light
Use	Lid applied to the top of a food container and yogurt cups			

6. Aluminum Foil For Air Conditioner

Alloy	Temper	Thickness	Width	Surface
8011\3012	O\H22\H24	0.09-0.16mm	100-1200mm	Double-sided light
Use	Used for production of the air conditioning wing piece			

7, Pharmaceutical aluminium foil

Alloy	Temper	Thickness	Width	Surface
8011/8021/1235	O/H18	0.020-0.030mm	200-1300mm	Single light
Use	Heavy duty blister foil for pharmaceutical uses			

8. Aluminum Foil for Cable or Lithium Battery

Alloy	Temper	Thickness	Width	Surface
8011\1060	O\H22\H24	0.009-0.02mm	100-1000mm	Double light/Single light
Use	Used to make all kinds of optical cable shielding and lithium battery base material			

9. Aluminum Strip for Cable

Alloy	Temper	Thickness	Width	Surface
8011\1100	O\H22\H24	0.09-0.2mm	100-1200mm	Double-sided light
use	Used for production of the cable to use base material			

Advantages of large aluminum foil roll:

1, High and stable quality

2, Very cheap price

3, As we also manufacture foil container and household foil rolls, so the container use aluminum foil and packing foil will always have production plan, it will short your lead time!

- 4, Long time export experience will help you solve all kinds problem, save money and time!
- 5, Very good elongation, anti-corrosion
- 6, Generally used in industry and architecture industries
- 7, Suitable for making tableware, receptacles
- 8, Packing:Covering with brown paper and plastic bag then packed with wooded plywood then directly loading into container for transshipment

Application of large rolls of aluminum foil for sale:

- 1) Chocolate and candy packaging. At present, chocolate is basically packaged in aluminum foil, and its market demand is increasing with the expansion of the chocolate consumer market. There are two situations for candy packaging, one is aluminum-plastic composite or aluminum paper composite packaging, and the other is aluminized film or single plastic packaging;
- 2) Convenience food, cooked food packaging. Such as instant noodles, local specialty foods, etc. With the development of the food business market, the demand for such packaging is increasing, and the development prospect is very optimistic;
- 3) Packaging for dairy products. At present, milk powder is basically packaged in aluminum-plastic composite packaging, and liquid milk products are mainly packaged in aluminum foil cartons.
- 4) A considerable part of tea, coffee and other products are packaged in aluminum-plastic composite packaging, which is also an important market for aluminum foil packaging.
